**CERTIFIED MAIL: 7011 0110 0000 4529 8920**

**Subject: Farragut State Park, Reuse Permit LA-000220-01, Minor Permit Modification**

Dear Mr. Ricks:

This letter is a notification regarding a modification to the Farragut State Park Permit LA-000220-01 issued by the Idaho Department of Environmental Quality (DEQ) on December 10, 2009. Your permit is currently scheduled to expire on January 1, 2015. This modification, referred to as Modification 1, extends the permit expiration date by one (1) year. With the issuance of this modification, Farragut State Park is permitted to continue operating the wastewater reuse system under the terms and conditions of the current permit until January 1, 2016.

Per IDAPA 58.01.17.700, a modification may be initiated by DEQ in the event of a change to standards or regulations after the permit was issued. In 2011, IDAPA 58.01.17 (Recycled Water Rules) were changed to allow DEQ to issue permits for up to 10 years. Per the Recycled Water Rules, this modification is considered a minor modification; therefore, no public comment period is necessary.

Annual reports and monitoring data from the Farragut State Park recycled water system demonstrate substantial compliance with Permit LA-000220-01. Permit LA-000220-01 allows Farragut State Park to irrigate up to 9.7 million gallons per year on 27.6 acres. Hydraulic loading has ranged between 0.86 and 2.18 million gallons through the duration of this permit. Allowing Farragut State Park to continue operating the reuse facility in compliance with their permit for an additional year will not pose any increased risk to human health or the environment.

Please note that the dates of the compliance activities listed in the permit will not change. All monitoring and reporting requirements, including submittal to DEQ of an annual site performance report, remain unchanged by this permit modification and applies to the permit extension period.

The attached document, Modification "1," serves as the modification to the expiration date of
