

North Fork Coeur d'Alene River – Lower Watershed Tour

Wednesday, June 18, 2008

We will meet at 9 am in Kingston (see map below). There is a Shoshone County-owned parking lot just south of the Shell station on the Coeur d'Alene River Rd. We will meet there and carpool for the tour. Transportation will be provided. We will visit several sites along the North Fork Coeur d'Alene River and tributaries on our way up to Prichard. Our focus will be on sites related to the sediment and temperature TMDLs. Lunches will not be provided and we will be stopping in Murray where you are welcome to join us at the Spragpole. Our tour will continue on Beaver Creek and then we will return to the carpool lot by 3pm at the latest. Should be fun and informative!

If you plan on attending, please let me know ASAP as I need a head count for the vehicles and lunch. We still have room. I hope for sunshine. If it is raining, we will reschedule.
