**North Idaho Air Quality Forecast & Burn Advisory**

**Forecast for Friday October 30, 2020 through  
Sunday November 1, 2020**

**Forecast Discussion:** A few degrees of warming is expected today. A cold front will bring breezy winds and mainly mountain rain and snow for Friday. Air quality will be in the MODERATE range for the Sandpoint and St. Maries areas and in the GOOD range for all other areas on Friday.

- DEQ continues to ask for your help in assisting with COVID-19 relief efforts. If you are considering residential or “backyard” burning, please think about postponing your burn if possible.
- Smoke from open burning can cause unnecessary public health concerns, and emergency services have limited resources to respond to out-of-control burns.
- Learn more at <https://www.deq.idaho.gov/news-archives/air-nonessential-burning-update-covid-19-0320/>

DEQ recognizes that agriculture-related burning, weed control burning, and prescribed fire are often necessary prior to planting and to reduce fire risk.
